Leading Axion-Photon Sensitivity with NuSTAR Observations of M82 and M87

Orion Ning
University of California, Berkeley
Lawrence Berkeley National Laboratory

with Benjamin Safdi
arXiv:2404.14476

Image: NASA, ESA, and The Hubble Heritage Team (STScI/AURA)

Key Highlights:

1. New axion-photon constraints using NuSTAR observations of M82/M87 galaxies
2. Use of full galaxies as a probe of axion physics

A Tale of Two Galaxies

M82

M87

A Tale of Two Galaxies

M82

M87

- Starburst Galaxy
- Indications of Strong B-fields

Images: NASA, ESA, and The Hubble Heritage Team (STScI/AURA)

A Tale of Two Galaxies

M82

- Starburst Galaxy
- Indications of Strong B-fields

M87

- Massive Elliptical
- Extended Virgo Cluster B-fields

Images: NASA, ESA, and The Hubble Heritage Team (STScI/AURA)

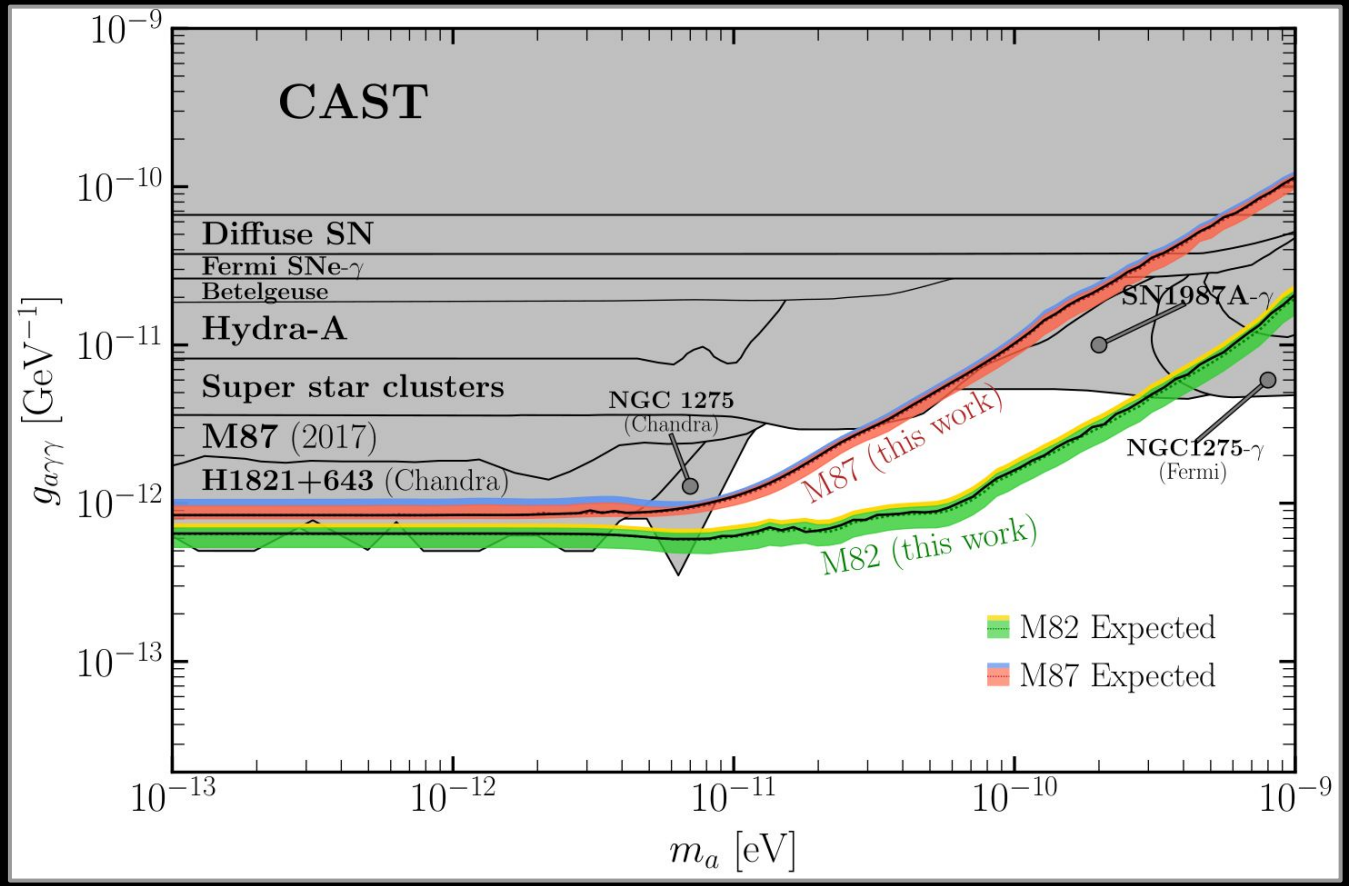
The variability in galaxy candidates and magnetic fields = largest source of uncertainty in our analysis

No evidence for axions from NuSTAR = Upper limits on coupling

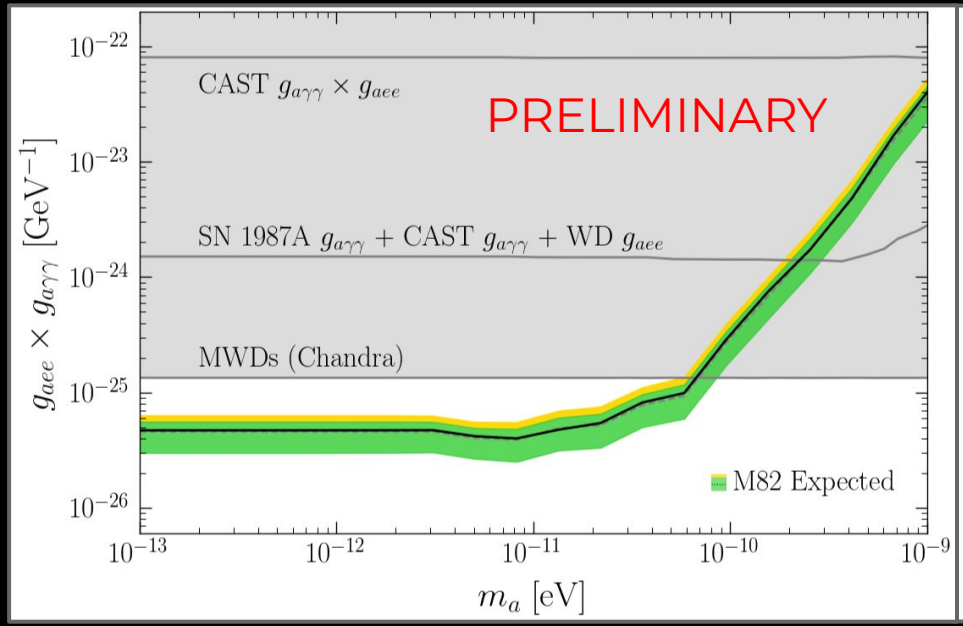


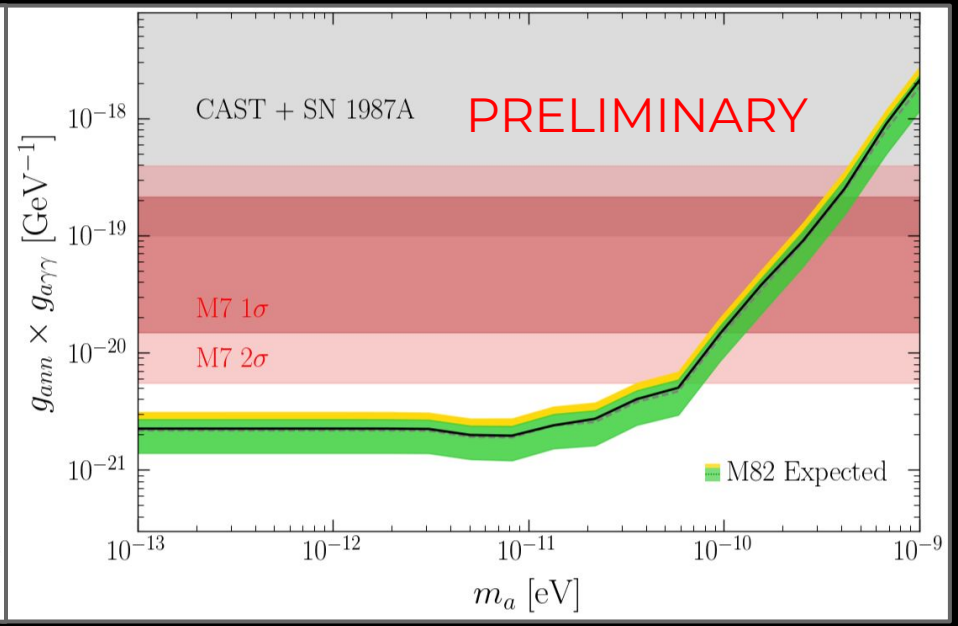
Previous Limits: C. O'Hare

In Progress: Can M82 give strong limits for other couplings?

In Progress: Can M82 give strong limits for other couplings?

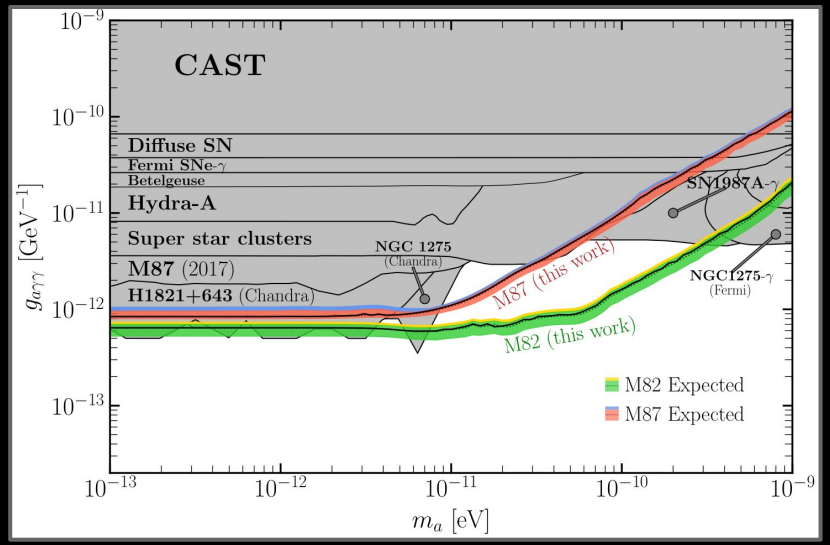
- Tentative strong limits for axion-electron and axion-nucleon couplings from bremsstrahlung production
- Highlights NS population in latter case





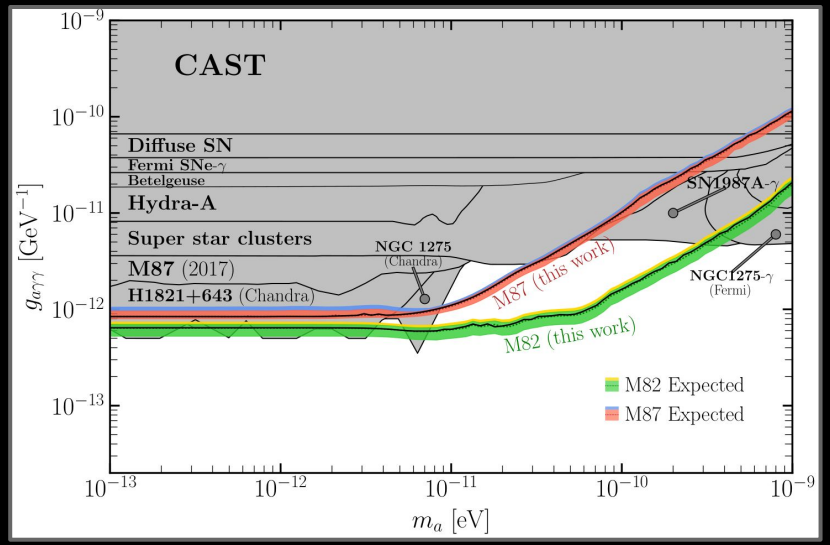
Conclusion and Outlook

- Leading constraints on the axion-photon coupling from X-ray observations of all stars in M82/M87



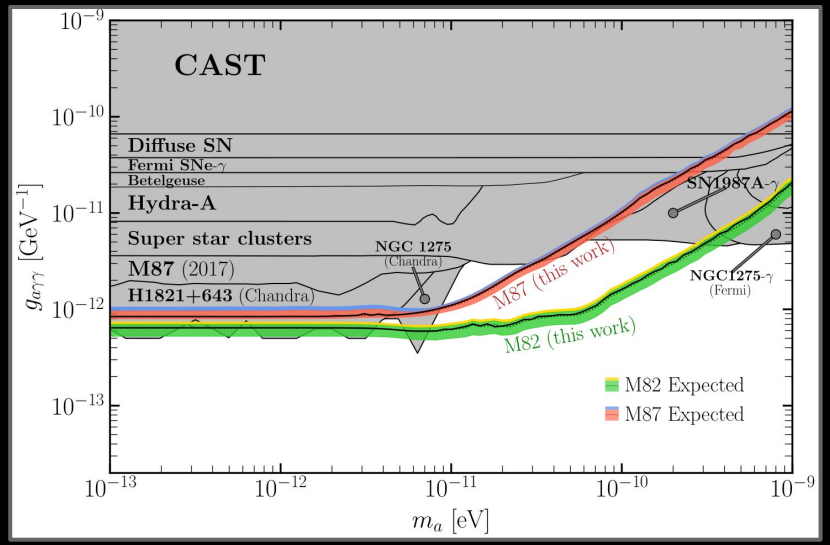
Conclusion and Outlook

- Leading constraints on the axion-photon coupling from X-ray observations of all stars in M82/M87
- Galaxies as a probe of axion physics



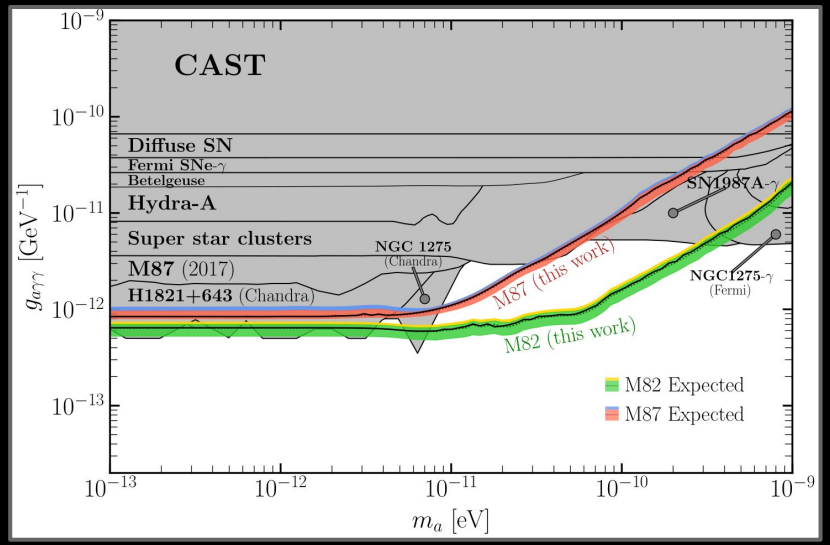
Conclusion and Outlook

- Leading constraints on the axion-photon coupling from X-ray observations of all stars in M82/M87
- Galaxies as a probe of axion physics
- Magnetic fields dominant source of uncertainty



Conclusion and Outlook

- Leading constraints on the axion-photon coupling from X-ray observations of all stars in M82/M87
- Galaxies as a probe of axion physics
- Magnetic fields dominant source of uncertainty
- Can extend to other galaxies, clusters, and axion-electron and axion-nucleon couplings



Thanks for listening!
